

PICC MIDLINE WORKSHOP + MORE!

EVIDENCE-BASED QUALITY TRAINING OFFERED ON A CONVENIENT SCHEDULE

PICC Resource strives to offer no less than excellence in our services. Classes and programs are developed and taught utilizing industry standards and guidelines for PICC and Midline insertion, care, and maintenance set by U.S. and international organizations that promote quality and safety in vascular access. Since 2003, we have trained thousands of health care professionals throughout the U.S. in venous access procedures. We've received numerous requests for online access to our popular PICC workshops. We listened and developed several options to compliment our in-person classes. I am very pleased to present our 2013 PICC and Midline training programs. *Alice Cennamo*
